AMENDMENT

Please replace all prior versions and listings of claims with the following listing of claims.

LISTING OF CLAIMS:

1. (Currently Amended) A computer implemented method of using a web-site for

reducing excess capacity during non-peak demand periods for a service business that

experiences periods of peak demand and periods of non-peak demand for \underline{a} service that is

offered at a predetermined price, the method comprising the steps of:

enabling one or more businesses to post on the web-site one or more items for auction

wherein the one or more items are valid for use during the non-peak demand period;

enabling one or more users to place a bid on an item for auction;

processing bids to determine a winner; and

awarding the winner the item, wherein the item is redeemable for the service from a

corresponding one of the one or more businesses during the non-peak demand period,

whereby the winner of the item obtains a discount from the predetermined price during the

non-peak demand period and non-winners pay the predetermined price without the discount

during the non-peak demand period.

2. (Previously Presented) The computer implemented method of claim 1 wherein the one

or more businesses set a minimum bid for the one or more items for auction.

3. (Previously Presented) The computer implemented method of claim 1 wherein the

corresponding one of the one or more businesses is a restaurant and the item for auction is a

dining certificate for use at the restaurant and the dining certificate has a redemption amount

whereby the winner obtains the dining certificate for an amount less than the redemption

amount.

Attorney Docket No.: 043311-0313722

Reply to Office Action mailed Jan. 26, 2007

4. (Previously Presented) The computer implemented method of claim 1 wherein the

step of enabling one or more users to bid on the item for auction includes a registration

process where each of the one or more users provides at least one or more of identification,

demographic and service preference information.

(Previously Presented) The computer implemented method of claim 1 wherein each of

the one or more businesses is a restaurant and the step of enabling one or more businesses to

post one or more items for auction includes a registration process where the restaurants

provide at least one or more of a restaurant description, meal description and facilities

description.

5.

6. (Previously Presented) The computer implemented method of claim 1 wherein each of

the one or more businesses is a restaurant and a user can search for one or more auctions of

interest by one or more of a restaurant name, cuisine type, location, specified time, and meal.

7. (Previously Presented) The computer implemented method of claim 1 wherein the

step of enabling one or more users to place a bid on the item for auction includes placing a

quantity of item amount and a bid amount.

8. (Previously Presented) The computer implemented method of claim 1 wherein the

step of enabling one or more users to place a bid on the item for auction includes an auto-bid

feature where a user submits a maximum bid amount and a bid increment amount where the

bids are automatically incremented to the maximum amount as necessary.

9. (Previously Presented) The computer implemented method of claim 1 wherein the

step of enabling one or more users to place a bid on the item for auction includes an instant

purchase feature that enables the one or more businesses to specify a fixed dollar amount for

which a user can buy one of the one or more items without participating in the auction.

Page 3 of 35

Attorney Docket No.: 043311-0313722

Reply to Office Action mailed Jan. 26, 2007

10. (Previously Presented) The computer implemented method of claim 1 wherein a user

can create a personalized auction page where the user creates an auction list comprising a list

of one or more auctions of interest and monitors the one or more auctions of interest on the

auction list.

11. (Withdrawn) The computer implemented method of claim 1 further comprising the

step of rewarding a user for referring one or more new users to the web-site.

12. (Withdrawn) The computer implemented method of claim 1 further comprising the

step of rewarding a user for referring one or more new businesses to the web-site.

13. (Withdrawn) The computer implemented method of claim 1 further comprising the

step of enabling a user to monitor rewards awarded to the user and redeem the rewards.

14. (Previously Presented) The computer implemented method of claim 1 further

comprising the step of enabling the one or more businesses to display an advertisement for an

auction at a premium space.

15. (Previously Presented) The computer implemented method of claim 1 further

comprising the step of displaying a list of current auctions and enabling a user to participate in

a current auction.

16. (Previously Presented) The computer implemented method of claim 1 wherein the one

or more businesses are restaurants and a restaurant guide enables a user to search for one or

more restaurants of interest by one or more of cuisine type, location, and price range.

17. (Withdrawn) The computer implemented method of claim 16 further comprising the

step of enabling users to post at least one of a community rating and a review of dining

experiences at one or more restaurants of interest.

Page 4 of 35

Attorney Docket No.: 043311-0313722

Reply to Office Action mailed Jan. 26, 2007

18. (Withdrawn) The computer implemented method of claim 16 further comprising the

step of enabling users to view ratings of one or more restaurants of interest posted by other

users.

19. (Withdrawn) The computer implemented method of claim 16 further providing a

hyper-link to a separate restaurant page containing information regarding a restaurant of

interest including one or more of a description of the restaurant, type of food, services, and

facilities.

20. (Withdrawn) The computer implemented method of claim 1 further comprising the

step of providing a recipe center where users may view recipe and cooking information.

21. (Withdrawn) The computer implemented method of claim 1 further comprising the

step of providing a gifts center where users may purchase merchandise.

22. (Withdrawn) The computer implemented method of claim 1 further comprising the

step of enabling users to participate in a chat/message board.

23. (Previously Presented) The computer implemented method of claim 1 further

comprising the step of enabling the one or more businesses to track and monitor current bids

on the one or more items posted by the one or more businesses.

24. (Previously Presented) The computer implemented method of claim 1 further

comprising the step of enabling the one or more businesses to set an auction schedule where a

business designates a specified number of items to be auctioned at a specified time period.

25. (Previously Presented) The computer implemented method of claim 1 further

comprising the step of enabling the one or more businesses to create a survey for users to

Page 5 of 35

Attorney Docket No.: 043311-0313722

Reply to Office Action mailed Jan. 26, 2007

complete where users provide one or more of demographic, identification, and service

preference information and where the information is used for targeted marketing and

promotions.

26. (Previously Presented) The computer implemented method of claim 1 wherein bidding

data and user information are aggregated and provided to the one or more businesses and

wherein the one or more businesses use the bidding data and the user information collected

for at least one of: targeted marketing and promotions.

27. (Previously Presented) The computer implemented method of claim 26 wherein the

user information includes sales history data.

28. (Previously Presented) The computer implemented method of claim 1 further

comprising the step of enabling users to specify a preferred mode of information delivery from

the one or more businesses including one or more of email, a display at a personalized page on

the web-site, and regular mail.

29. (Previously Presented) The computer implemented method of claim 1 further

comprising the step of providing an account module where the one or more businesses can

monitor a number and type of items sold along with its account status with the web-site.

30. (Previously Presented) The computer implemented method of claim 1 further

comprising the step of providing the one or more businesses with a summary page outlining

results of an auction for one or more items posted by the one or more businesses.

31. (Previously Presented) The computer implemented method of claim 1 further

comprising the step of receiving from the one or more businesses a report indicating which

winners redeemed auctioned items.

Page 6 of 35

Attorney Docket No.: 043311-0313722

Reply to Office Action mailed Jan. 26, 2007

32. (Previously Presented) The computer implemented method of claim 1 further

comprising the step of enabling the winner to download the item for redemption from the

web-site or via electronic mail.

33. (Previously Presented) The computer implemented method of claim 1 wherein the

winner pays for the item at the time of redemption and any amount over the value of the item.

34. (Previously Presented) The computer implemented method of claim 1 wherein the

winner pays for the item at the time the winner is declared.

35. (Previously Presented) The computer implemented method of claim 1 wherein an

electronic certificate is sent to the one or more businesses and the winner informs the

corresponding one of the one or more businesses of the electronic certificate at a time of

redemption.

36. (Currently Amended) A computer implemented system for of using a web-site for

reducing excess capacity during non-peak demand periods for a service business that

experiences periods of peak demand and periods of non-peak demand for a service that is

offered at a predetermined price, the system comprising:

a business module for enabling one or more businesses to post on the web-site one or

more items for auction wherein the one or more items are valid for use during the non-peak

demand period;

a user module for enabling one or more users to place a bid on an item for auction;

a system processor for processing bids to determine a winner; and

an award module for awarding the winner the item, wherein the item is redeemable for

the service by from a corresponding one of the one or more businesses during the non-peak

demand period, whereby the winner of the item obtains a discount from the predetermined

price during the non-peak demand period and non-winners pay the predetermined price

without the discount during the non-peak demand period.

Page 7 of 35

Attorney Docket No.: 043311-0313722

Reply to Office Action mailed Jan. 26, 2007

37. (Previously Presented) The system of claim 36 wherein the one or more businesses set

a minimum bid for the one or more items for auction.

38. (Previously Presented) The system of claim 36 wherein the corresponding one of the

one or more businesses is a restaurant and the item for auction is a dining certificate for use at

the restaurant and the dining certificate has a redemption amount whereby the winner obtains

the dining certificate for an amount less than the redemption amount.

39. (Previously Presented) The system of claim 36 wherein the user module includes a

registration module where each of the one or more users provide at least one or more of

identification, demographic and service preference information.

40. (Previously Presented) The system of claim 36 wherein each of the one or more

businesses is a restaurant and the business module is a restaurant module that includes a

registration module where each of the restaurants provide at least one or more of a restaurant

description, meal description and facilities description.

41. (Previously Presented) The system of claim 36 wherein the one or more businesses are

restaurants and a user can search for one or more auctions of interest by one or more of a

restaurant name, cuisine type, location, specified time, and meal.

42. (Original) The system of claim 36 wherein the user module includes placing a quantity

of item amount and a bid amount.

43. (Previously Presented) The system of claim 36 wherein the user module includes an

auto-bid feature where a user submits a maximum bid amount and a bid increment amount

where bids are automatically incremented to the maximum bid amount.

Page 8 of 35

Attorney Docket No.: 043311-0313722

Reply to Office Action mailed Jan. 26, 2007

44. (Currently Amended) The system of claim 36 wherein the user module includes an

instant purchase feature that enables the one or more businesses to specify a fixed dollar

amount for which a user can buy the one of the one or more items without participating in the

auction.

45. (Original) The system of claim 36 wherein a user can create a personalized auction

page where the user creates an auction list comprising a list of one or more auctions of interest

and monitors the one or more auctions of interest on the auction list.

46. (Withdrawn) The system of claim 36 further comprising a reward module where a user

is rewarded for referring one or more new users to the web-site.

47. (Withdrawn) The system of claim 36 further comprising a reward module where a user

is rewarded for referring one or more new businesses to the web-site.

48. (Withdrawn) The system of claim 36 further comprising a reward monitor module

where a user can monitor rewards awarded to the user and redeem the rewards.

49. (Previously Presented) The system of claim 36 further comprising an advertisement

module where the one or more businesses can display an advertisement for an auction at a

premium space.

50. (Previously Presented) The system of claim 36 further comprising a current auction

module where a list of current auctions is displayed to a user where the user can participate in

a current auction.

51. (Previously Presented) The system of claim 36 wherein the one or more businesses are

restaurants and a restaurant guide enables a user to search for one or more restaurants of

interest by one or more of cuisine type, location, and price range.

Page 9 of 35

52. (Withdrawn) The system of claim 51 further comprising a ratings module where users

can post ratings and reviews of dining experiences at one or more restaurants of interest.

53. (Withdrawn) The system of claim 51 further comprising a view ratings module where

users can view ratings of one or more restaurants of interest posted by other users.

54. (Withdrawn) The system of claim 51 further providing a hyper-link to a separate

restaurant page containing information regarding a restaurant of interest including one or

more of description of the restaurant, type of food, services, and facilities.

55. (Withdrawn) The system of claim 36 further comprising a recipe center where users

can view recipe and cooking information.

56. (Withdrawn) The system of claim 36 further comprising a gifts center where users can

purchase merchandise.

57. (Withdrawn) The system of claim 36 further comprising a chat/message board for

users to converse with other users and business representatives.

58. (Previously Presented) The system of claim 36 further comprising a monitor current

bids module where the one or more businesses can track and monitor current bids on items

posted by the one or more businesses.

59. (Previously Presented) The system of claim 36 further comprising an auction schedule

module where the one or more businesses can set an auction schedule where the one or more

businesses designate a specified number of items to be auctioned at a specified time period.

Page 10 of 35

Attorney Docket No.: 043311-0313722

Reply to Office Action mailed Jan. 26, 2007

60. (Previously Presented) The system of claim 36 wherein the one or more businesses can

create a survey for users to complete where users provide one or more of demographic,

identification, and service performance information where the information is used for targeted

marketing and promotions.

61. (Previously Presented) The system of claim 36 wherein bidding data and user

information are aggregated and provided to the one or more businesses and wherein the one

or more businesses can use the bidding data and user information collected for targeted

marketing and promotions.

62. (Original) The system of claim 61 wherein user information includes sales history data.

63. (Previously Presented) The system of claim 36 wherein users can specify a preferred

mode of information delivery from the one or more businesses including one or more of email,

a display at a personalized page on the web-site, and regular mail.

64. (Previously Presented) The system of claim 36 further comprising an account module

where the one or more businesses can monitor a number and type of items sold along with its

account status with the web-site.

65. (Previously Presented) The system of claim 38 wherein a summary page is provided to

the restaurant outlining results of an auction for one or more items posted by the restaurant.

66. (Previously Presented) The system of claim 36 wherein a report of attendance

indicating which winners redeemed items is received from the one or more businesses.

67. (Previously Presented) The system of claim 36 wherein the winner can download the

item for redemption from the web-site or receive it via electronic mail.

Page 11 of 35

Attorney Docket No.: 043311-0313722

Reply to Office Action mailed Jan. 26, 2007

68. (Original) The system of claim 36 wherein the winner pays for the item at the time of

redemption and any amount over the value of the item.

69. (Previously Presented) The system of claim 36 wherein the winner pays for the item at

the time the winner is declared.

70. (Previously Presented) The system of claim 36 wherein an electronic certificate is sent

to the corresponding one of the one or more businesses and the winner informs the

corresponding one of the one or more businesses of the certificate at time of redemption.

71. (Currently Amended) A computer implemented method for reducing excess capacity

during non-peak demand periods for a service business that experiences periods of peak

demand and periods of non-peak demand for a service that is offered at a predetermined

price, the method comprising the steps of:

[[a.]] providing a web site to which one or more businesses can post an offer to

auction one or more certificates for use during non-peak demand periods, the one or more

certificates having a predetermined value and being redeemable for services from a

corresponding one of the one or more businesses;

[[b.]] receiving at the web site a bid from one or more bidders, specifying an amount a

bidder is willing to pay for a certificate;

[[c.]] determining a winning bidder for the certificate;

[[d.]] issuing to the winning bidder the certificate, the certificate comprising

identification of the corresponding one of the one or more businesses, the predetermined

value of the certificate, a unique certificate identifier and user identification information,

whereby the winning bidder of the certificate obtains a discount from the predetermined price

during non-peak demand periods and non-winning bidders pay the predetermined price

without the discount during non-peak demand periods;

[[e.]] providing to the one or more businesses a list of winning bidders;

Page 12 of 35

Attorney Docket No.: 043311-0313722

Reply to Office Action mailed Jan. 26, 2007

[[f.]] receiving from the one or more businesses a report indicating which bidders

have redeemed certificates; and

[[g.]] collecting from the one or more businesses a fee, including a fee for certificates

redeemed.

72. (Previously Presented) The computer implemented method of claim 71 wherein the

one or more businesses are restaurants and the web site enables potential bidders to search

for auctions of interest by one or more of a restaurant name, cuisine type, location, specified

time, and meal.

73. (Previously Presented) The computer implemented method of claim 71 wherein the

web site comprises one or more featured auctions sections that prominently display certain

auctions.

74. (Previously Presented) The computer implemented method of claim 73 wherein the

step of collecting a fee from the one or more businesses comprises collecting a premium fee

for featured auctions.

75. (Previously Presented) The computer implemented method of claim 72 wherein results

of a search retain a list of auctions meeting user specified search criteria and summary

information about each auction, where each auction in the list comprises a hyper-link to a

separate web page for that auction, the web page comprising more detailed information about

the auction.

76. (Previously Presented) The computer implemented method of claim 75 wherein the

web site further comprises a bid page from which a user can enter a bid, the bid page

comprising a hyper-link to the separate web page for a particular auction.

Page 13 of 35

Attorney Docket No.: 043311-0313722

Reply to Office Action mailed Jan. 26, 2007

77. (Previously Presented) The computer implemented method of claim 71 wherein the

winning bidder pays for the certificate at a time the certificate is redeemed along with a

payment for any amount for the service over the value of the certificate.

78. (Previously Presented) The computer implemented method of claim 71 wherein the

winning bidder pays for the certificate at the time the winning bidder is declared.

79. (Previously Presented) The computer implemented method of claim 71 further

comprising the step of receiving at the web site and storing profile information from a bidder

prior to enabling the bidder to bid on an auction.

80. (Previously Presented) The computer implemented method of claim 79 wherein the

profile information comprises at least one of a user identification, user contact information and

user preference information, and further comprising the step of contacting a user when

auctions corresponding to the user preference information are posted.

81. (Previously Presented) The computer implemented method of claim 79 further

comprising the step of making available to each user for whom profile information is stored a

personalized auction information page, the personalized auction page comprising personalized

auction lists, auction reward information and current profile information.

82. (Withdrawn) The computer implemented method of claim 71 wherein the web site

further comprises a restaurant guide, the method further comprising the step of receiving at

the web site restaurant reviews by users.

83. (Withdrawn) The computer implemented method of claim 82 wherein the restaurant

guide is searchable and comprises a hyper-link from a search result page to auctions for

restaurants listed on the search result page.

Attorney Docket No.: 043311-0313722

Reply to Office Action mailed Jan. 26, 2007

84. (Previously Presented) The computer implemented method of claim 71, the web site

further comprising an auction status listing, the method further comprising the step of

displaying current auction status information comprising an auction closing time and bid

information including a current bid, a bid increment and a minimum bid.

85. (Previously Presented) The computer implemented method of claim 71 wherein the

one or more businesses may permit one or more certificates to be subject to an instant award

at a fixed amount whereby a user can ensure entitlement to a certificate by paying the fixed

amount rather than participating in an auction.

86. (Previously Presented) The computer implemented method of claim 71 wherein the

web site comprises a proxy bidding system where a bidder can specify a maximum amount the

bidder is willing to bid for a certificate and the proxy bidding system will enter bids

automatically for the bidder up to the specified maximum.

87. (Previously Presented) The computer implemented method of claim 71 further

comprising an auction management module for a registered business, the auction

management module comprising a listing of the registered business's current auction postings,

customer information, and certificate sales history.

88. (Previously Presented) The computer implemented method of claim 71 comprising an

auction management module, the auction management module enabling a registered business

to create, delete and modify auctions and track current bid information.

89. (Previously Presented) The computer implemented method of claim 71 further

comprising the step of collecting at the web site information about each bidder that bids on

one or more certificates for a particular business, and providing to the particular business

aggregate data on each bidder that bids on one or more certificates for the particular business,

including demographic information, bid frequency and number of redemptions.

Page 15 of 35

Attorney Docket No.: 043311-0313722

Reply to Office Action mailed Jan. 26, 2007

90. (Previously Presented) The computer implemented method of claim 89 further

comprising the step of generating a targeted promotion directed at customers of a particular

business based on the aggregate data.

91. (Previously Presented) The computer implemented method of claim 87 further

comprising the step of analyzing historical sales data to determine average winning bid

amounts for certificates having a predetermined value, by a specified time period.

92. (Previously Presented) The computer implemented method of claim 91 further

comprising the step of using the average winning bid amount and adding a premium to it to

determine an instant award amount.

93. (Previously Presented) The computer implemented method of claim 71 further

comprising an account page for each of the one or more businesses that enables a business to

view a number and a type of certificates the business has sold, the business's account status

with the web site and business profile information.

94. (Previously Presented) The computer implemented method of claim 71 wherein the

step of posting an offer further comprises enabling a business to enter one or more of an item

description, time restriction information, a value, a minimum bid amount, a quantity of

certificates, a duration of the auction and a recurrence of the auction.

95. (Previously Presented) The computer implemented method of claim 94 further

comprising the step of offering to the business one or more options to increase a likelihood

that consumers will focus on the business's auction, the options including a boldface title for

the auction, a category feature auction and an auction home page feature, and further

comprising the step of collecting a premium from the business for using one or more of such

options for a given auction.

Page 16 of 35

96. (Previously Presented) The computer implemented method of claim 71 further

comprising the step of maintaining an auction attendance list, the list comprising, for each

auction on the list, an auction identification number, a close date, a retail amount value, time

restrictions information, winning bidder information and redemption status information.

97. (Previously Presented) The computer implemented method of claim 71 further

comprising the step of e-mailing customers notification that an auction has been posted.

98. (Previously Presented) The computer implemented method of claim 71 further

comprising the step of collecting user profiles at the web site, determining auctions of interest

to specified users based on preference information in the users profile and contacting the

specified users about auctions corresponding to the specified users preference information.

99. (Withdrawn) The computer implemented method of claim 71 comprising the step of

providing an award credit to users that refer one or more businesses to the web site.

100. (Previously Presented) The computer implemented method of claim 71 further

comprising the step of notifying a losing bidder that an auction that the bidder bid on closed

without the bidder being a winning bidder and notifying the bidder of other auctions that

correspond to one or more parameters of the auction on which the bidder unsuccessfully bid.

101. (Withdrawn) The computer implemented method of claim 71, the web site further

comprising a recipe page to enable users to share recipes.

.02. (Currently Amended) An on-line system for reducing unused capacity for one or more

businesses during non-peak demand periods, where the one or more businesses experience

periods of peak demands and periods of non-peak demands for a service that is offered at a

predetermined price, the system comprising:

Page 17 of 35

[[a.]] a web site to which a business can post an offer to auction one or more certificates for use during non-peak demand periods to reduce unused capacity, the one or more certificates having a predetermined value and being redeemable for services from the business;

- [[b.]] a bidding module for receiving at the web site a bid from one or more bidders, specifying an amount the one or more bidders are willing to pay for a certificate;
 - [[c.]] a processor for determining a winning bidder for the certificate;
- [[d.]] a certificate issuing module for issuing to the winning bidder the certificate, the certificate comprising identification of the business, the predetermined value of the certificate, specified times for use of the certificate, a unique certificate identifier and user identification information, whereby the winning bidder of the certificate obtains a discount from the predetermined price during non-peak demand periods and non-winning bidders pay the predetermined price without the discount during non-peak demand periods;
 - [[e.]] a listing module for providing to the business a list of winning bidders;
- [[f.]] a report module for receiving from the business a report indicating which bidders have redeemed certificates; and
 - [[g.]] a fee module for collecting from the business a fee for certificates redeemed.
- 103. (Previously Presented) The system of claim 102 wherein the business is a restaurant and the web site enables potential bidders to search for auctions of interest by one or more of a restaurant name, cuisine type, location, specified time, and meal.
- 104. (**Original**) The system of claim 102 wherein the web site comprises one or more featured auctions sections that prominently display certain auctions.
- 105. (**Original**) The system of claim 104 wherein the fee module comprises collecting a premium fee for featured auctions.

Attorney Docket No.: 043311-0313722

Reply to Office Action mailed Jan. 26, 2007

106. (Previously Presented) The system of claim 105 wherein results of a search retain a list

of auctions meeting user specified search criteria and summary information about the auction,

where each auction in the list comprises a hyper-link to a separate web page for that auction,

the web page comprising more detailed information about the auction.

107. (Original) The system of claim 106 wherein the web site further comprises a bid page

from which a user can enter a bid, the bid page comprising a hyper-link to the separate web

page for a particular auction.

108. (Previously Presented) The system of claim 102 wherein the winning bidder pays for

the certificate at the time the certificate is redeemed along with a payment for any amount

over the value of the certificate.

109. (Previously Presented) The system of claim 102 wherein the winning bidder pays for

the certificate at the time the bidder is declared the winning bidder.

110. (Original) The system of claim 102 further comprising a profile module for receiving at

the web site and storing profile information from a bidder prior to enabling the bidder to bid

on an auction.

111. (Previously Presented) The system of claim 110 wherein the profile information

comprises at least user identification, user contact information and user preference

information, further comprising the step of contacting a user when auctions corresponding to

the user preference information are posted.

112. (Original) The system of claim 110 further comprising a personalized auction page for

each user for whom profile information is stored, the personalized auction page comprising

personalized auction lists, auction reward information and current profile information.

Page 19 of 35

Reply to Office Action mailed Jan. 26, 2007

113. (Withdrawn) The system of claim 102 wherein the web site further comprises a

restaurant guide, the system further comprising restaurant reviews by users at the web site.

114. (Withdrawn) The system of claim 113 wherein the restaurant guide is searchable and

comprises a hyper-link from a search result page to auctions for restaurants listed on the

search result page.

115. (Previously Presented) The system of claim 102, the web site further comprising an

auction status listing, the system further comprising a display module for displaying current

auction status information comprising an auction closing time and bid information including a

current bid, a bid increment and a minimum bid.

116. (Previously Presented) The system of claim 102 wherein a business may permit one or

more certificates to be subject to an instant award at a fixed amount wherein a user can

ensure entitlement to a certificate by offering the fixed amount rather than participating in an

auction.

117. (Original) The system of claim 102 wherein the web site comprises a proxy bidding

system where a bidder can specify a maximum amount the bidder is willing to bid for a

certificate and the proxy bidding system will enter bids automatically for the bidder up to the

specified maximum.

118. (Previously Presented) The system of claim 102 further comprising an auction

management module for a registered business, the auction management module comprising a

listing of the registered business's current auction postings, customer information, and

certificate sales history.

Page 20 of 35

Attorney Docket No.: 043311-0313722

Reply to Office Action mailed Jan. 26, 2007

119. (Previously Presented) The system of claim 102 comprising an auction management

module, the auction management module enabling registered businesses to create, delete and

modify auctions and track current bid information.

120. (Previously Presented) The system of claim 102 wherein information about each

bidder that bids on one or more certificates for a particular business is collected at the web

site, and providing to the particular business aggregate data on each bidder that bids on one or

more certificates for the particular business, including demographic information, bid frequency

and number of redemptions.

121. (Previously Presented) The system of claim 120 wherein a targeted promotion directed

at customers of the particular business based on the aggregate data is generated.

122. (Original) The system of claim 118 wherein historical sales data is analyzed to

determine average winning bid amounts for certificates having a predetermined value, by a

specified time period.

123. (Original) The system of claim 122 wherein a premium is added to the average winning

bid amount to determine an instant award amount.

124. (Previously Presented) The system of claim 102 further comprising an account page for

each business to enable a business to view a number and type of certificates the business has

sold, the business's account status with the web site and the business's profile information.

125. (Previously Presented) The system of claim 102 wherein posting an offer further

comprises enabling a business to enter one or more of an item description, time restriction

information, a value, a minimum bid amount, a quantity of certificates, a duration of the

auction and a recurrence of the auction.

Reply to Office Action mailed Jan. 26, 2007

126. (Previously Presented) The system of claim 125 wherein the business is offered one or

more options to increase a likelihood that consumers will focus on the business's auction, the

options including a boldface title for the auction, a category feature auction and an auction

home page feature, and further comprising the step of collecting a premium from the business

for using one or more of such options for a given auction.

127. (Original) The system of claim 102 further comprising an auction attendance list

comprising, for each auction on the list, an auction identification number, a close date, a retail

amount value, time restrictions information, winning bidder information and redemption

status information.

128. (Previously Presented) The system of claim 102 wherein users are notified that an

auction has been posted by email.

129. (Previously Presented) The system of claim 102 wherein user profiles are collected at

the web site, auctions of interest to specified users based on preference information in the

user profiles are determined and a user is informed of auctions corresponding to the users

preference information.

130. (Withdrawn) The system of claim 102 wherein an award credit is provided to users that

refer businesses to the web site.

131. (Previously Presented) The system of claim 102 further comprising a notification

module for notifying a losing bidder that an auction the bidder bid on closed without the

bidder being a winning bidder and notifying the bidder of other auctions that correspond to

one or more parameters of the auction on which the bidder unsuccessfully bid.

132. (Withdrawn) The system of claim 102, the web site further comprising a recipe page to

enable users to share recipes.
